**After Care Instructions for Temporaries: Crowns, Bridges and Veneers**

Your treatment today consisted of the placement of one or more temporary restorations. This means you will see an immediate but not final result which may include (but not limited to) a whiter, straighter smile and stronger teeth.

These temporary restorations require special care so that they can aid in the healing process and remain secure until the placement of the final, permanent restoration.

1. Brush twice daily and after sugary snacks or drinks
2. DO NOT Eat anything sticky (taffy or gum, etc.) or hard (hard pretzels, nuts or crusty bread, etc.) on these teeth as this may break or dislodge the temporaries. Cut food into small pieces.
3. DO NOT floss around temporaries, unless dentist advises you to floss, this may dislodge or loosen the temporaries.
4. Some mild sensitivity due to temperature may occur. If this persists for more than 4 days, contact us.
5. Of your temporaries become loose or dislodges, contact us immediately.
6. CALL US IF YOU HAVE ANY QUESTIONS OR DIFFICULTIES.

Following most surgical procedures there may or may not be pain, depending on your threshold for pain. You will be provided with medication for discomfort that is appropriate for you. If a narcotic has been prescribed, follow the directions carefully. If you have any questions about these medications interacting with other medications you are presently taking, **PLEASE CALL OUR OFFICE, YOUR PHYSICIAN AND/OR YOUR PHARMACIST.**
